

California Advanced Homes Program™ (CAHP)
Single Family Project Letter of Interest
 Projects in Pacific Gas & Electric Service Territory

Dear CAHP team,

_____ (Builder/custom home owner) would like to participate in the CAHP (“Program”) (building to 2016 Code) with Pacific Gas and Electric (PG&E) for the _____ (Project name) project located in _____ (Project city) with a total of _____ (Number of) lot(s). I understand that the Program is a statewide, residential new construction energy-efficiency program, funded by utility customers through the Public Purpose Programs surcharge. I am interested in improving the energy efficiency of my project using financial incentives, design assistance, and marketing support available through the Program.

I agree to provide a complete program application package within 90 days of submitting my Letter of Interest (LOI). A complete application package consists of a complete and fully executed application, building plans, energy models, Title 24 documentation, and a will serve letter from PG&E. I will consider efficiency recommendations that may improve the performance of my project. I am aware that my Title 24 documentation must be prepared by a Certified Energy Analyst, and that I am responsible for hiring a HERS rater to perform the energy efficiency verifications. Additionally, I agree to provide energy model revisions within 10 business days of receiving the plan reviewer’s revision requests.

I understand that by fully complying with the Program timelines stated above, my project eligibility date will coincide with the date this LOI is received by TRC. I understand that if I do not comply with the Program timelines stated above, my project eligibility date will be revised to the date a **completed** application is received by TRC. Further, **I am aware that any lots that have HERS testing, or that have drywall and/or sheetrock installed prior to the project eligibility date will not be eligible to receive Program incentives.**

It is also understood that projects will be accepted into the program on a first come first serve basis with the date of a **completed application package** serving as the basis for enrollment. Further, I acknowledge that this letter of interest is not a guarantee of project eligibility, and that notice of project eligibility must come directly from TRC.

I understand that participation in the Program is voluntary, and that I am under no obligation to modify the design or construction of my project based on the resulting recommendations. I also understand that I will receive financial incentives only if I complete an agreement; that my eligibility is established by the utility, the performance of my project meets the Program requirements, and the energy-efficiency measures are installed and verified.
