

# Advanced Energy Rebuild

Web Version

1

## WHAT IS AER?

Advanced Energy Rebuild provides financial incentives to rebuild energy efficient new homes after major wildfires.

>> [Program Handbook](#)

2

## WHO IS ELIGIBLE?

AER incentives are available to all homes that were red-tagged by CAL FIRE in the 2017 or 2018 northern California wildfires and received service from PG&E, MCE and/or Sonoma Clean Power.

3

## WHAT INCENTIVES ARE AVAILABLE?

Homeowners may receive \$7,500 - \$17,500 per home, depending on the program pathway selected and energy efficiency measures installed.

>> [Incentive Overview](#)

4

## WHO CAN HELP ME PARTICIPATE?

All new home projects in California use an energy consultant for planning and permitting and a HERS rater to verify energy savings. The AER program requires that your energy consultant is a Certified Energy Analyst (CEA).

>> [Find a CEA or HERS Rater](#)

5

## HOW DO I QUALIFY?

Homeowners select from two different pathways: all-electric and mixed fuel. Each pathway has a set of building requirements for a project to receive the incentives. A solar and battery storage bonus is also available.

>> [Pathway Options](#)

6

## HOW DO I ENROLL?

Complete the AER application [online](#).
